

Creating solutions as software for your needs.

We are your best option for launching your product, brand or bussiness.

About Us Bliss DDM

We build technological solutions and custom software

We are a technological company dedicated to develop the best solution for your business' needs. We build custom software using the latest technologies implementing different platforms as web, mobile and desktop with UI and UX as our main focus delivering quality products helping companies to grow efficiently

A team with human quality that allows generating an effective work environment with results.

Our Process

Team

Made up of capable people, committed, united and working a common objective.

Actions

Dedication, customer and user care, constant dialogue and quality work.

"We create solutions for your needs"

Together with customers and users we make a team with fantastic results.

User

All our projects are focused for the best experience, being the main purpose.

Technology

Always up-to-date, in constant search for the best platforms and technologies to create and enhance our projects.

eds" n with fantastic results.

Our Services

We offer complete and custom software development on an affordable price allowing the small companies like yours to grow to the next level. Our clients get a result that will benefit their company or business.

Our Services

Web development

We create web pages focused on the user, designing unique experiences, presenting navigation paths, meeting real demands.

Software development

We analyze the structure, function, process and context of your business to enhance your productivity through software.

We are integrators connecting your devices to the cloud using dashboards for information access and management.

Our Services

Mobile development

We create mobile solutions, using the latest technologies, providing a comprehensive service of planning, design, publication and maintenance.

Visual Identity Design

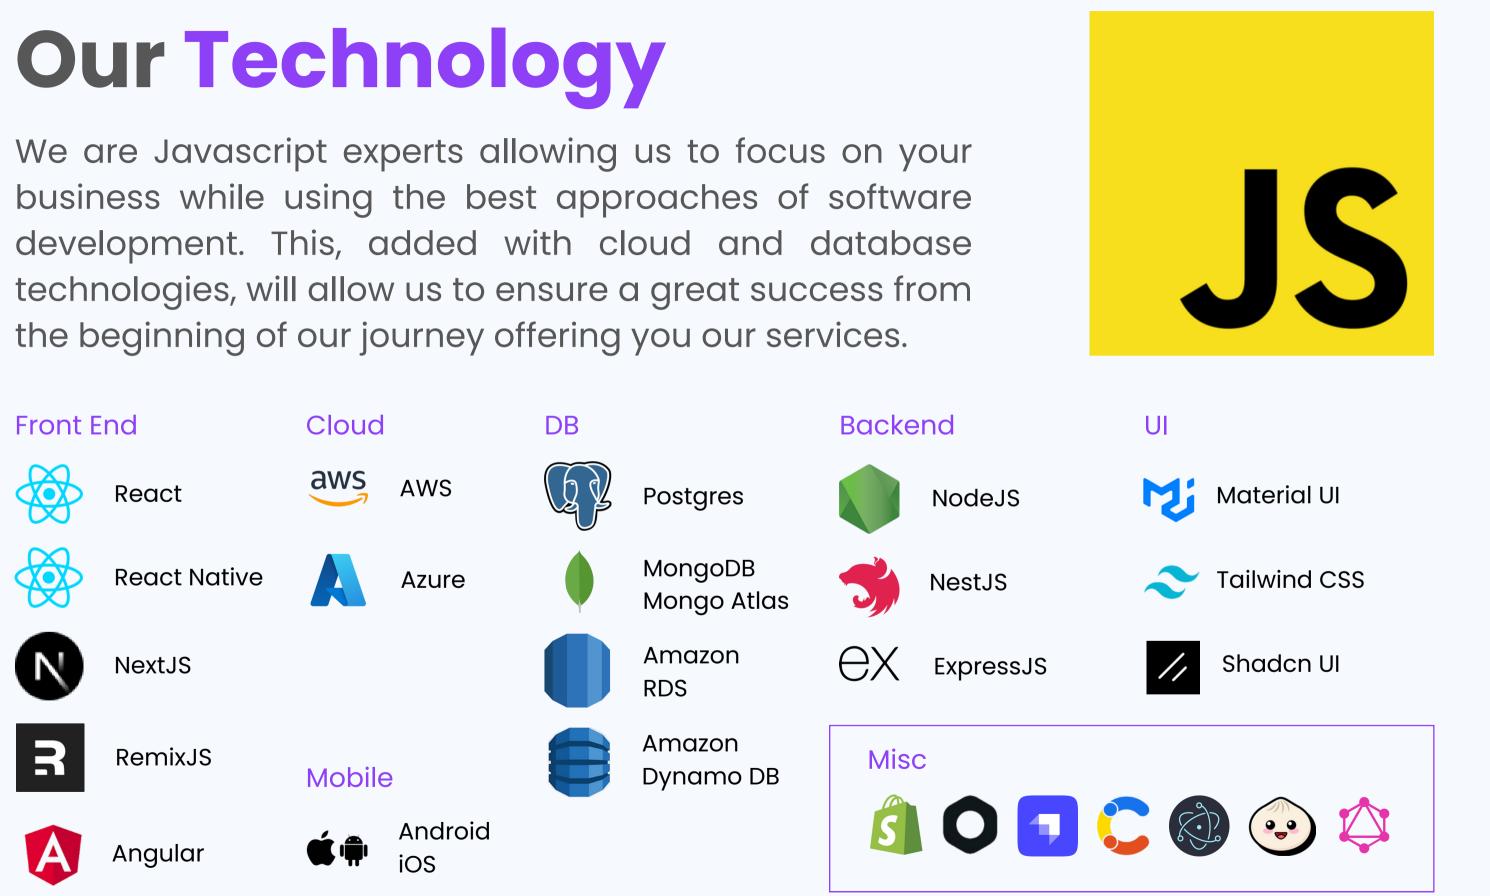

We create the visual part of your company or brand, giving it the image that is needed to reach its goal.

Digital Commerce

We develop virtual stores to achieve a greater number of sales, entering the new digital era, modernizing your point of sale and saving human capital.

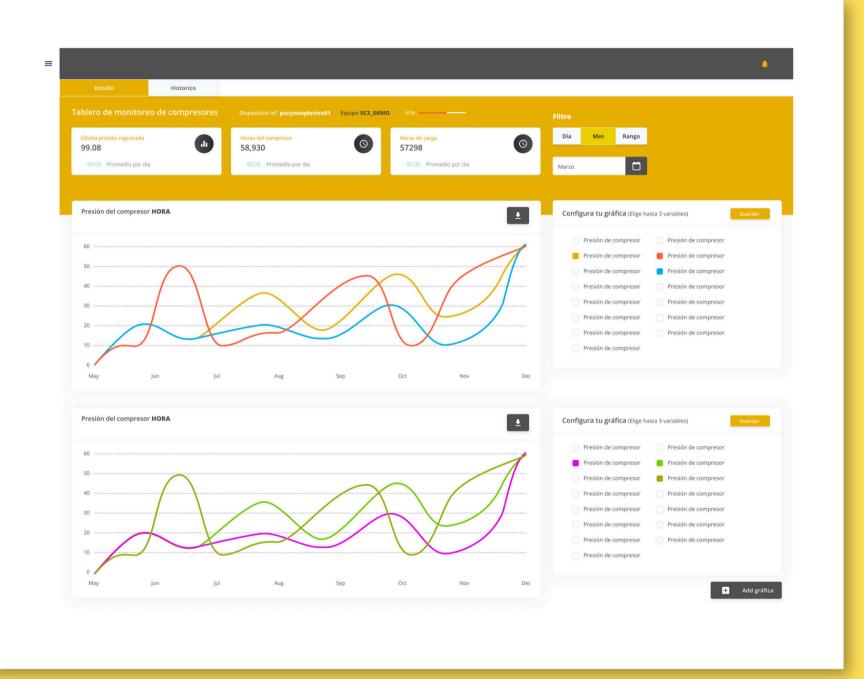

Software for compressors management and monitoring through IoT devices.

We connected their devices to the cloud creating a dashboard for visualization and information management of their compressors.

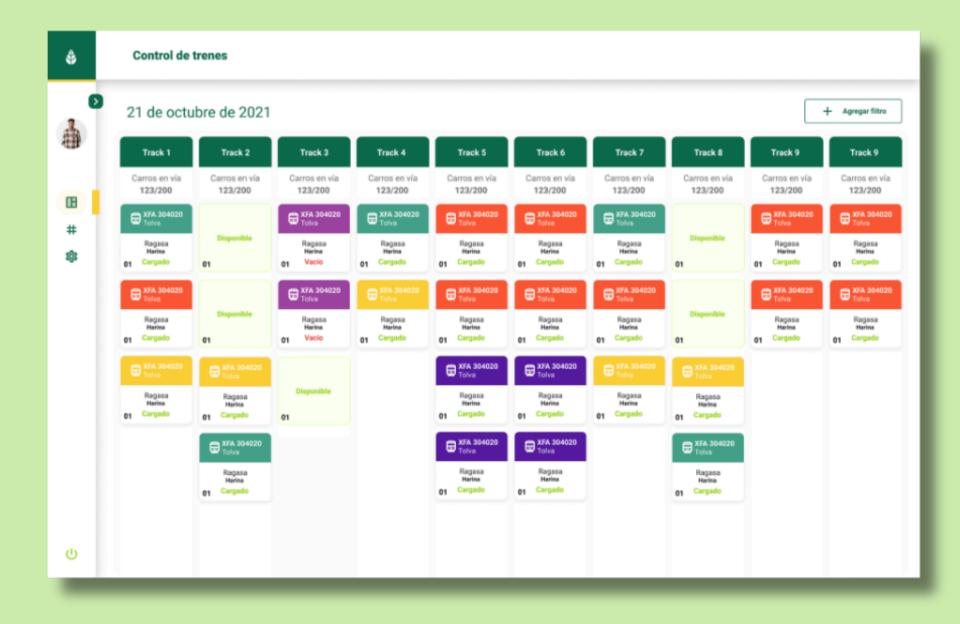

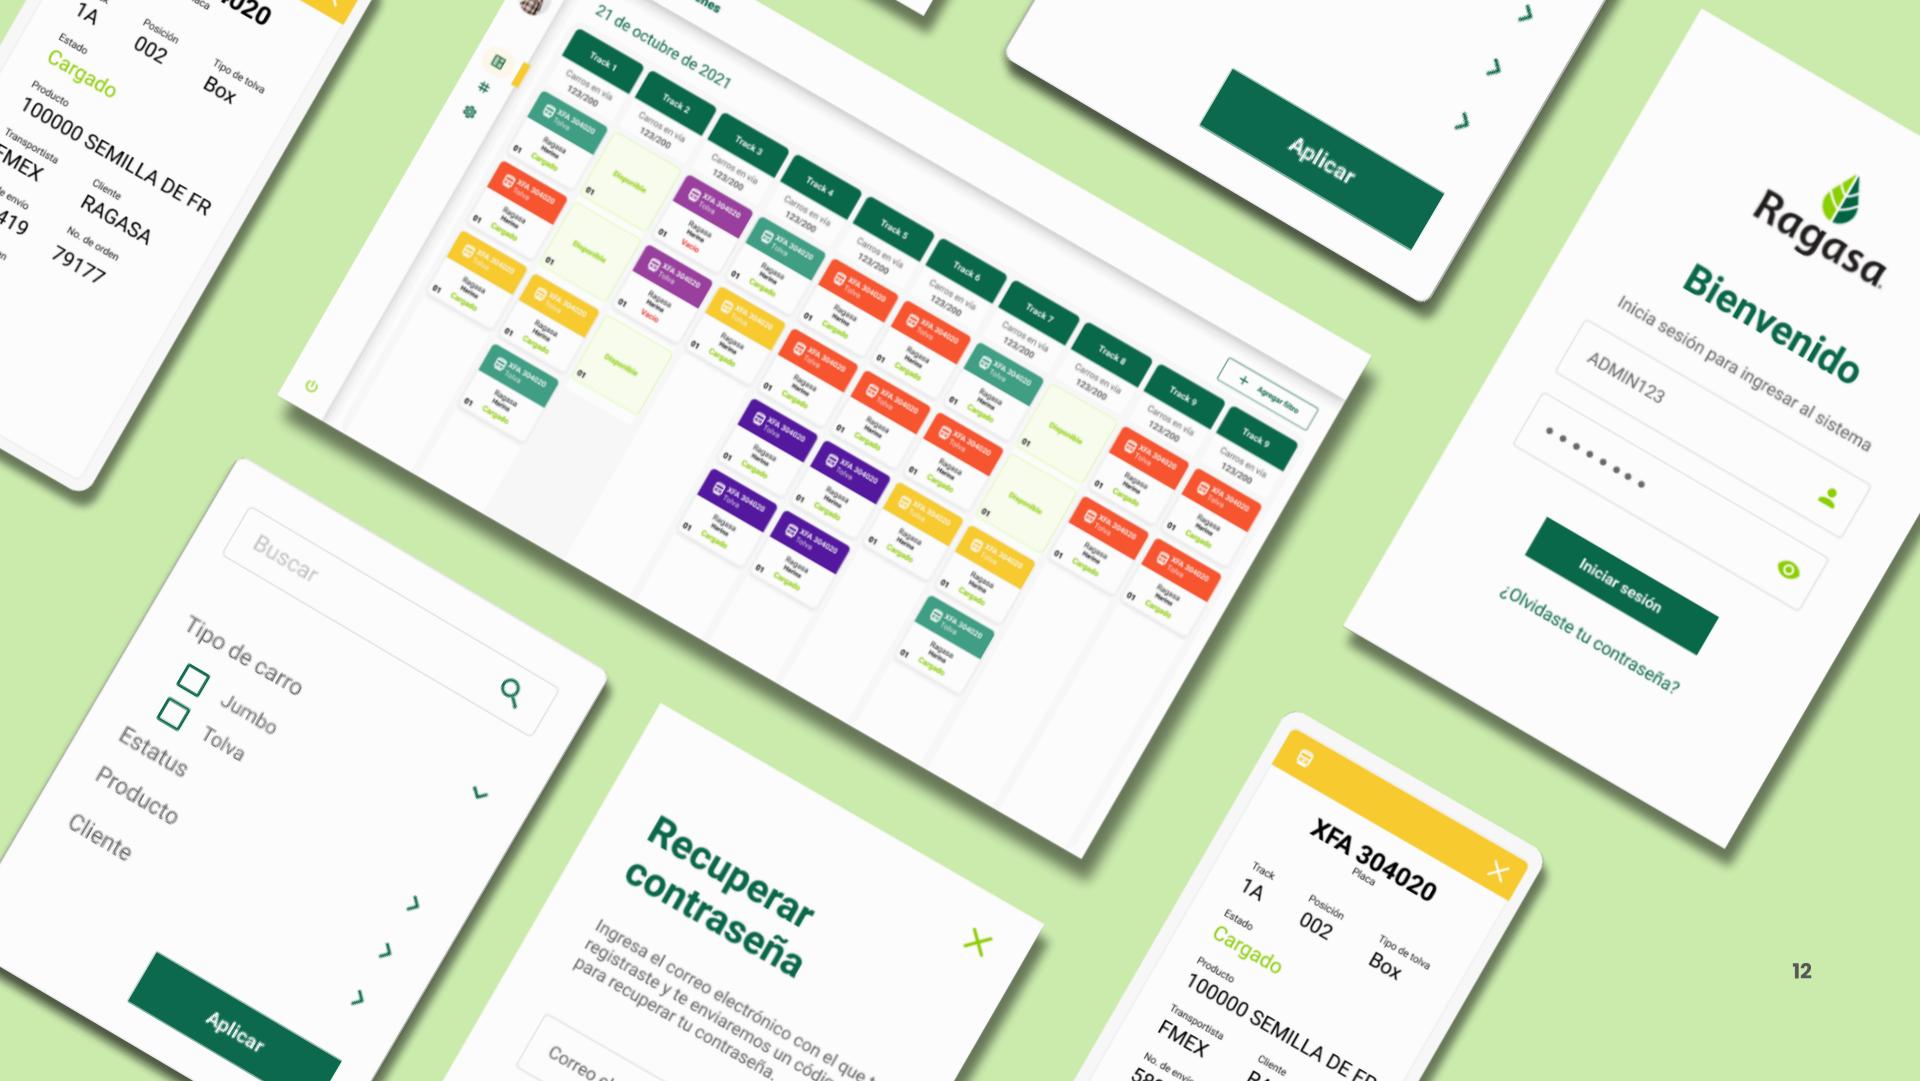

Custom software for train management; wag control system, inputs, outputs, load detail.

MIVET APP

Veterinarian clinic management design and development.

Mi vet is a veterinarian clinic management software, helping establishments of any size handle their customers, pets, clinic appointments, vet consultations, medicines and products inventory and accounts.
